**CURRENT MONTH PROJECT ISSUES/STATUS:** *(activities, meetings, deliverables, etc.)*

Based on comments received from the USEPA regarding the Remedial Design (RD) Work Plan, revised RD Work Plan pages along with additional response information were submitted to USEPA and others for delivery on April 7, 2003.

As noted in last month's status memorandum, the supporting RD Work Plan documents were delivered on March 31, 2003. These documents include a Health and Safety Plan (HASP), Field Sampling Plan (FSP) and Quality Assurance Project Plan (QAPP). These supporting plans will become appendices to the RD Work Plan upon revision and approval.

Supplemental portions to the RD Work Plan document consisting of the Pilot Studies' details are currently in preparation. These Pilot Studies supplements are to be submitted to USEPA on June 2, 2003.

Efforts are being conducted to secure access to properties other than those under the control of Hamilton Sundstrand for the performance of RD Work Plan implementation. Also, other pre-mobilization and logistical information is being assimilated in preparation of coming field activities.
